

**newshore\_**

## **Solutions for the Airline Industry**

**Manizales, 2020**

## Requirements

- Generate the proposed design from the designs folder.
- Use the index.html found in the code folder, it is not editable.

## Evaluation points

- Level of similarity with the design
- Responsive design
- Implementation of good practices
- Used tools
- Code documentation
- Maintainability of the code
- Modularity

## The problem

Focused on the fact that Newshore is a company that is specialized in developments at the Travel level, it is proposed to generate the design of a page that is usually had within some of the airlines we work with.

Design focused on having a Header, option to change the language, and navigation menus, button with the option to redirect to search for flights.

Offer module design

Footer that includes redirection to social networks and sitemap that the page may have.
